# Empower your employees while safeguarding your organisation

with workplace solutions
tailored for local government

**Security remains a major issue for local government.**

## 49%
have IT security issues such as network vulnerabilities.

## 30%
have IT in operation with poor control over their sensitive information.

(Office of the Auditor General Western Australia Security)

In the race to hastily implement workplace solutions for remote working, it's important not to overlook the equally important need to safeguard your organisation from constantly evolving cybersecurity threats.

That's why, at Managed IT, we offer truly integrated secure workplace solutions that empower your employees with the latest tools for productivity, collaboration and innovation, while also keeping your data and devices highly secure and compliant.

## Secure Remote Working for local government

Drawing on our local knowledge and established 15+ year history of working with bodies of all sizes in Western Australia, we offer comprehensive end-to-end workplace solutions tailored specifically your requirements.

**ESSENTIAL: SECURE REMOTE WORKING**

## Set up the essentials for a secure modern workplace

Our 'Essential' solution helps employees work from anywhere, anytime and on any device so you can boost productivity, enhance collaboration while keeping your organisation safe.

**Improve productivity and collaboration**
Provid staff with access to the latest applications like Teams to foster greater collaboration and productivity.

**Facilitate engagement and innovation**
Improve employee engagement by giving employees the latest tools and encourage innovation.

**Gain greater control and insight into security**
Gain more input and control over the way employees use IT assets with better insights on how you are protected.

# Optimise the workplace with enhanced protection

Our 'Optimal' solution goes a step further with advanced security features that protect government bodies against advanced threats, while ensuring you remain compliant at all times.

### Protect against advanced threats
Protect against spam, viruses, ransomware and phishing attacks, and keep Windows 10 devices safe.

### Protect against data leaks
Restrict copying, saving and sharing business information, and backup email to a secure archive.

### Control access to business information
Strengthen secure access, protect shared documents, and control information on all devices.

## Truly integrated and fully managed

Secure Remote Working is supported by a comprehensive stack of fully managed and truly integrated IT services. Together they reduce the time, stress and effort of managing complex systems and multiple third parties, so you can focus on your core activities.

### Local expertise
We put our customers at the centre of everything we do with personalised service from local experts who understand your specific government requirements.

### End-to-end processes
We never see things in isolation and draw on a stack of managed IT services developed specifically to optimise the workplace end-to-end.

### Best-in-class technology
We provide enterprise grade technology solutions no matter what your size, leveraging partnerships with leading companies like Microsoft and Citrix.
